

Structure of the Earth

Convection currents

Plate boundaries

Plate boundaries (cont'd)

Tectonics—example 2
preparation and impacts

Volcanoes—location and
hotspots

1. Complete as many sections as you can—10 minutes
 2. Complete each of the 12 sections. USE your revision to help
 3. Feel free to use key words and images / diagrams
 4. Write key words in CAPITALS as your brain remembers these better
 5. A range of colours is also good to aid memory
 6. Once completed, turn over and repeat step 1 aiming to complete each section in 5 minutes—time yourself
- Remember: focused revision for 18 minutes at a time then take a break

Tectonics—example 1
preparation and impacts

Volcanoes—types

Predicting earthquakes

Predicting volcanoes, including long term
planning and short term relief

Earthquakes and tsunamis

Earthquakes
